NOTES:

AutoCAD® hatch pattern files can be downloaded from belgard.com for use in architectural drawings

Some patterns may not necessarily reflect the percentages of stone sizes within a particular pallet. In some cases you may have extras in one or more of the sizes. This must be accounted for in your planning and design.

Percentages are based on area by paver.

Installing circle pavers

- 1) Start by marking out circles on the surface to be paved.
- 2) Determine the dimensions of each concentric circle, as well as the layout details.
- 3) Always lay pavers starting from the center.
- 4) For a semicircle or quarter-circle, follow the same laying order.
- 5) Carefully follow the detailed instructions on installation guide.

To get a complete circle, be sure to follow the laying order illustrated at right.

Each pallet contains enough pavers for:

- 2 circles with a diameter of 6' 5"
- •1 circle with a diameter or 9'5"

2 pallets contains enough pavers

1 circle with a diameter of 13'6"
